

Descaler
for automatic coffee centres, kettles and steam ovens
Article No.: 00311968
Content: 500ml bottle

Coffee machines

Steam oven, kettles

Product features

- The liquid descaler effectively removes limescale in the entire interior of the appliance
- No time for dissolving needed
- Internal equipment parts, hoses and pumps are perfectly cleaned
- After use the appliance is hygienically clean
- Can improve the lifetime and performance of the appliance
- Tested and approved for our appliances
- Made in Germany

Application

Fully automatic coffee machines, filter coffee machines, steam ovens with water tanks, kettles and hot water dispensers

Frequency of use: Every 1-2 months. Please refer always to the instruction manual or display tip.

Instruction

This products is usable in very different types of appliances. Due to the various ways of descaling the appliances we recommend to always refer to the instruction manual of the appliance or the display tip.

Manufacturer

PMS Thomin GmbH
Meckesheimer Str. 7/1
D-74939 Zuzenhausen

FAQ:

1. How often do I need to descale my appliance?
 - To ensure that your appliance operates perfectly, it is recommended to descale every 1-2 month in accordance with your appliance. Alternatively you can also use our non-dangerous liquid descaler (for material numbers, please see alternative products).
2. Can I use acid or vinegar acetic acid instead of descaler?
 - We advise you not to clean your machine with home remedies. Home remedies with acid or vinegar can attack the seals and rubber parts of your device.
3. Do I need to clean my appliance in spite of descaling?
 - Descaling products have no cleaning properties. In order to remove coffee grease we recommend to use our cleaning tablets (for material numbers, please see alternative products).

Marketing concept

- **Target Group**
All owners of semi and fully automatic coffee machines, steam ovens with water tank, kettles
- **Insight**
I would like to descale my appliance as simply and effectively as possible.
- **Benefit**
Through the use of the liquid descaler, lime scale deposits are being removed from the pipes easily, quickly and thoroughly. This can prolong the lifetime of the appliance.
- **R2B**
The original liquid descaler is ideally adapted to our appliances. No additional time for dissolving is needed. The efficacy was tested and approved in our own plants.
